## Stopping the Spread of Germs with Advanced UV-C Disinfection

### HIGH TOUCH, HIGH RISK

Infection prevention is becoming increasingly critical in today's healthcare settings. A growing volume of science points to shared medical workstations and equipment being fomites for pathogen transmission. Studies have revealed the presence of HAI-related pathogens on 1 in 4 frequently touched surfaces. What if there was a way to keep these surfaces more than 99% pathogen free—with no interruption to workflow? Introducing UV Angel®.

### AUTOMATED DISINFECTION WHILE YOU WORK

Attaching directly to devices and equipment, UV Angel is as unobtrusive as it is effective. An LED light indicates disinfection status.

Red light = Touch detected

Blue light = Disinfecting

Green light = Disinfected

# WHILE YOU'RE WORKING, SO IS UV ANGEL

Using an intelligent, automated UV-C light disinfection platform, UV Angel continuously monitors to detect when surfaces have been used and safely disinfects hundreds of times a day without any assistance from staff.

## Continuous Monitoring

The moment a potential threat is detected on surfaces such as keyboards, monitors and equipment, UV Angel begins breaking down the bacteria at the cellular level, killing greater than 99%.

## Disruption-Free Workflow

The UV Angel platform can target and disinfect surfaces hundreds of times a day, providing 24/7 disruption-free workflow.

## Real-Time Data

UV Angel provides real-time reports on multiple data points, including how often and how long surfaces are disinfected. Use your data to demonstrate the highest safety standards.

## Added Protection

Working in tandem with existing infection prevention strategies, UV Angel helps you more effectively protect patients, caregivers, and families from harmful bacteria.

## CLINICALLY PROVEN RESULTS

As published in the American Journal of Infection Control, UV Angel is greater than 99% effective at killing bacteria.

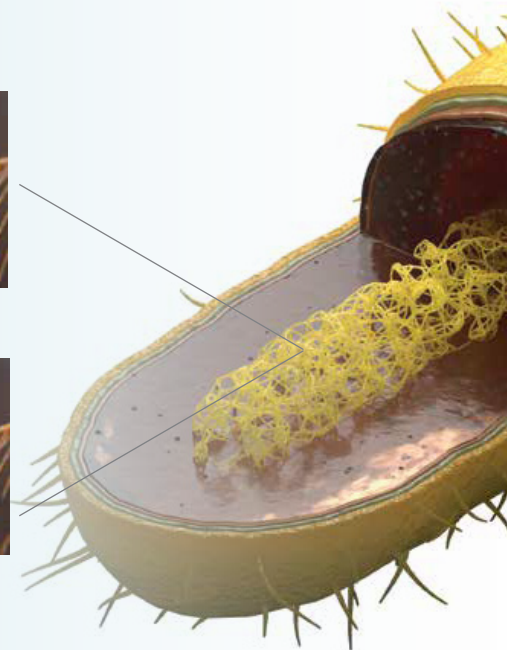

**Patented UV-C technology alters pathogen DNA, rendering it incapable of reproduction and infection.**

Before UV-C

After UV-C

### About UV Angel®

UV Angel is a technology-based company creating healthier environments through the elimination of harmful pathogens. Patented and proven safe, our automated UV-C platform continuously monitors and disinfects frequently touched surfaces like smartphones, keyboards, touchscreens, medical equipment, and more. With solutions for healthcare, food service, retail, industrial, and consumer, our technologies operate without chemicals or interruptions to workflow or daily life. For OEM's seeking to distinguish their products, we provide complete UV-C product integration—from design and testing to tooling and safety certification. UV Angel provides organizations the ability to measure results using a robust cloud-connected data platform.
